Professional skincare treatments for the face and body, using leading brands

HALCYON DAYS opened in October 1990. The name is derived from Greek mythology, meaning peaceful, pleasant and calm. The business is owned by the brother and sister team of Lisa and Gary Stallings and was started when a property was converted to a salon on West Road, Bury St Edmunds. Gary and Lisa continued to study and upgrade their knowledge of their profession and by 1998 both Gary and Lisa had completed over 100 hours post graduate training with the International Dermal Institute and sat the exam. They were the only brother and sister team to have ever completed this together and to receive a diploma.

After 10 years of growth and development, Halcyon Days relocated to its present premises in Woolhall Street, in Bury St Edmunds' town centre. We have a great team of therapists who like us have a passion for this profession and a desire to learn and develop new skills.

Since then Halcyon Days has expanded its core treatments and now includes CACI non-surgical face lifting and the Ellipse Intense Pulse Light treatment hair reduction and skin rejuvenation. The salon is very strong in other treatments, such as organic waxing, Dermalogica facials, hot stone massage and OPI manicures and pedicures.

Halcyon Days has been a Dermalogica stockist since 1995 and for many years reached Platinum Status in the standards set by the company. Unfortunately Platinum Standards no longer exist, but Halcyon Days continues to set its own high standards.

Halcyon Days prides itself on offering only the best treatments and one of our new treatments now available is Axxium Gel Overlays, strong, beautiful, all one-length nails. The nails come in a variety of colours and provide a strong, lightweight layer of protection for your nails, you won't even realise you have them on your hands or your feet. The salon also stocks over 500 O.P.I polishes.

Another innovation from Halcyon Days is Platinum membership for clients. This offers the client £60 of treatments a month for a monthly fee of £42 and is available by standing order.

Also available at this long-established salon is 'Nouveau Contour' semi-permanent make up. The permanent cosmetics are applied by Lisa and you will then look your best, morning, noon and night. They will need top-up treatments annually to maintain the colour.

Another popular treatment is the famous St Tropez spray tan, great for special occasions and worth remembering with the party season coming up!
