Venus Freeze

What is Venus Freeze?

Venus Freeze is a device used to treat wrinkles, rhytides, tighten skin, reduce cellulite and circumferential fat. Using (MP)2 technology, this device delivers multi-polar radiofrequency and pulsed magnetic fields to the skin to produce a dense and uniform heat matrix. This causes collagen synthesis and contraction, fibroblast proliferation, neo-vascularity and lipolysis.

What areas of the body can be treated?

The face, Neck and entire body can be treated with Venus freeze (excluding breast tissue).

What kind of results will I get?

Tighter skin, softening of wrinkles, pumper, fuller and more youthful appearance, reduced cellulite and a more contoured silhouette.

How safe are the treatments?

Radiofrequency and magnetic pulses have been used in medicine for many years and are proven, safe and effective technologies. Your treatment provider will review your medical history and your aesthetic goal to see if Venus freeze is the right treatment for you.

How Many Treatments do I need?

The number of treatments required will vary from patient to patient, but typically 8 treatments will be required, one treatment per week for 8 weeks.

Is there any downtime? can I have a treatment in my lunch break and return to work straight away?

Absolutely! A treatment to one area only takes 30 mins.

Before & After

This is a before photo and a photo taken after the 7th treatment.
